EDUCATION

Preston University

Bachelor of Arts in Computer Science

Islamabad

Feb. 2014 – Jan 2019

Punjab College of Information and Technology

Associate's in Computer Studies

Rawalpindi

Jan. 2011 – Dec 2013

EXPERIENCE

Full Stack Developer

Up work

Jan 2019 – Present

Remote

- Developed scalable web/mobile apps using Laravel, React.js, Vue.js, and Flutter.
- Built RESTful APIs with secure auth and optimized MySQL/PostgreSQL performance.
- Integrated third-party services: SendGrid, Twilio, Firebase, Vimeo, PayPal, and COD.
- Deployed applications on AWS (EC2, ECS, RDS, S3) and containerized with Docker.

Front end Developer

CDigital

CDigital is a provider of digital security solutions, software development, and consulting services based in Islamabad, Pakistan. They offer high quality and cost-effective security solutions, software development, and services to prestigious clients worldwide

May 2018 – Dec 2018

Rawalpindi

- Developed a vehicle permit management app (AKTA) with route fitness checks and document capture features.
- Built a web-based organic product listing platform with admin panel and search/filter functionality.
- Integrated SMS API for permit alerts and COD support for product orders.
- Managed relational data, user roles, and transaction records efficiently.
- Resolved technical issues in deployed systems and ensured smooth performance.

PROJECTS

Health Coin | Powermind App

May 2022 – April 2023

- Implemented user and role-based access management, integrated third-party services (SendGrid, Twilio), and ensured data security compliance.
- Backend for a mind-training app with real-time push features.

Fyles Landing Page | Cogen Job Portal

May 2022 – April 2023

- Created Laravel backend, integrated Fyles Library APIs, and implemented dynamic banners.
- Built job portal backend with authentication, job matching, and admin panel features.

Senegal Project | Kitchen WebApp

Oct 2021 – April 2022

- Developed PDF reports, contributed to time tracking, and handled production issues.
- Developed Laravel APIs and integrated Firebase for real-time order tracking.

Punjab Irrigation Department | My Sushi

Feb 2020 – Feb 2021

- Developed frontend/backend to visualize real-time sensor and weather data on maps.
- Real-time food delivery platform with performance upgrades.

AKTA | Organeco.pk

July 2018 – Jan 2019

- Transport Authority: Vehicle permits & SMS alerts with printable docs.
- Built e-commerce system for organic listings, search filters, and secure checkout.
